1 Profit from operations, excluding changes in fair value of investment properties and financial assets.

2 The ratio of the annual sales revenue reduced with real estate operating costs, and the real estate fair value increased with the estimated purchasers' costs.

3 Calculated with gross asset values, the assumed transaction costs are added to IFRS valuation figures.

4 Shopper Park Plus does not intend to sell properties, so deferred tax liabilities and transaction costs are not deducted.

5 Scenario if company assets are sold and liabilities are not held to maturity: deferred taxes, financial instruments and success fee are calculated as to the full extent of their liability.

6 The estimated rental value of vacant areas compared to the value of the entire portfolio.

7 The ratio of total liabilities (not covered by available free cash) compared the fair value of properties and other assets.

Comments:

Seasonally not adjusted, i.e. impact of turnover reconciliation is reported as it occurs.

GLA is adjusted as per latest measurement.

Increase of vacancy rates since Q3 2023 in assets in Hungary is predominantly due to the impact of the release of down size areas, which have been gradually handed over by Tesco to the landlord. These areas have been either subsequently relet or are in the process of being relet which is expected to increase occupancy rates going forward.
