EXTRAORDINARY ANNOUNCEMENT
Regarding the Review of the Listing of 4iG Plc.
Shares on the Nasdaq

4iG Plc. ("4iG" or the "Company") hereby informs its esteemed investors and participants in the money and capital markets that the Company's Board of Directors has decided to initiate an investigation and preparatory process aimed at listing 4iG's shares on a regulated U.S. capital market.

The shares of the Company's legal predecessor were listed on the Budapest Stock Exchange ("**BÉT**") on September 22, 2004, and the shares of 4iG Plc. have been traded in the BÉT Premium category since June 19, 2019. Thus, considering its predecessor's stock exchange presence, the Company has nearly twenty-two years of experience in the Hungarian capital market, established disclosure practices, regular IFRS reporting, and an institutionalized investor relations framework. 4iG's operations and corporate scale now significantly exceed the operational framework within which the Company originally entered the Hungarian capital market.

The Company's goal is for its shares—subject to the results of the preparatory process, the adoption of necessary corporate resolutions, compliance with applicable legal, regulatory, financial, and capital market requirements, and market conditions—be listed on the Nasdaq in the fourth quarter of 2027, according to the current preliminary schedule. A decision regarding the specific structure, its terms, and any potential capital raising may be made at a later stage of the process.

The planned listing could serve to expand 4iG's future capital-raising opportunities, increase the liquidity of its shares, and broaden its base of international institutional investors.

The Company is exploring the possible structures, terms, and timing of the listing with the involvement of U.S. investment banks, law firms, auditing firms, and capital markets advisors. These preparations include the necessary due diligence as well as compliance with U.S. capital market transparency, reporting, internal control, and corporate governance requirements, which are among the most stringent in the world.

The Company will inform investors and capital market participants of material developments in the process in accordance with applicable laws and capital market regulations.
