ALTEO brings warmth again to the homes of people in need – Christmas funds given to two NGOs

Budapest, December 8, 2025 – ALTEO continues its Christmas corporate social responsibility program this year to ensure that communities where heating and paying energy bills are among the biggest financial challenges can stay safe and warm during the winter months. Two NGOs, the Világítani Fogok Egyesület (Illuminating Lives Association) and the Egyenlő Esélyekért Alapítvány (Equal Opportunities Foundation), received a total of HUF 5 million in donation as part of the Company's 2025 energy poverty alleviation program.

The Egyenlő Esélyekért Alapítvány received a funding of HUF 3 million, which will enable them to begin modernizing their outdated heating system. With the help of these funds they can buy energy-efficient boilers and finance the related renovation of the chimney system. For more than two decades, the Foundation has been offering residential care and development services to people in vulnerable situations; a safe and reliable heating system is essential for their daily work.

The Világítani Fogok Egyesület has received a funding of HUF 2 million to purchase environmentally-friendly briquettes, which is expected to cover the needs of 40-50 households in need during the winter months. The association helps people living in small villages where heating in winter is the biggest financial burden. The program directly reduces costs for families, improves their living conditions and reduces the risk of hypothermia.

“Raising awareness to economical energy use and supporting communities are closely linked in our program, as both are aimed at ensuring adequate conditions for families and communities in need during the winter months. Energy efficiency modernization can help reduce heating costs in the long term, while direct funds for heating can provide immediate relief where an instant solution is needed. Winter energy poverty is a grave problem affecting many households, and so it is important for us to provide genuine help to those who are in the most difficult situation,” said *Beatrix Szabó, ALTEO's Director of Sustainability and HSE.*

As in previous years, the application process was carried out with the assistance of Civil Impact Nonprofit Kft.

ALTEO Group – ALTEO is a Hungarian-owned energy service provider and trading company with a modern mindset. Its business activities include the production and trade of energy from renewable energy carriers and natural gas, as well as energy services and projects tailored to individual corporate needs. The Company provides its customers, including Hungarian SMEs

PRESS RELEASE

and large corporations, with a reliable and environmentally responsible energy supply based on the sustainable use of renewable energy. Due to its own, optimally designed assets and virtual power plant, the Company provides its partners with the most innovative services of the highest quality. In recent years, innovative business sectors such as e-mobility, waste management and scheduling have been added to this range of services, where aspects of the circular economy are even more prevalent. ALTEO was first listed on the Budapest Stock Exchange in October 2010. In 2016, the Company successfully completed a public offering. The Company is an active participant of the capital market, and even after the public offering, it has continued to carry out private placements of shares and bonds among institutional investors. ALTEO is a dynamically developing company committed to sustainability and is always on the lookout for new opportunities for investment and growth. The Company is continuously working to ensure that it provides its customers and partners with the most innovative range of services of the highest quality in an effort to achieve a steady increase in shareholder value.
